

SECOND PROPOSAL

1. Organisation Overview

Organisation Name

Ubuntu Hope Foundation

Brief History

Ubuntu Hope Foundation is a non-profit organisation established to support vulnerable children, families and individuals within disadvantaged communities. The organisation was created in response to the growing need for food assistance, educational support, basic necessities and community development programmes.

The organisation works with volunteers, donors and community partners to provide practical support to people facing financial and social challenges.

Mission Statement

The mission of Ubuntu Hope Foundation is to improve the lives of vulnerable individuals and families by providing essential resources, support, education and opportunities that promote dignity and independence.

Vision Statement

The vision of Ubuntu Hope Foundation is to build stronger and healthier communities where every individual has access to basic necessities, support and opportunities to achieve a better future.

Target Audience

The website will target:

- * People in need of assistance.
- * Parents and families.
- * Donors and potential sponsors.
- * Volunteers.

- * Community organisations.
 - * Businesses interested in corporate social investment (CSI).
 - * Individuals interested in supporting charitable causes.
-

2. Website Goals and Objectives

Website Goals

The main goal of the Ubuntu Hope Foundation website is to create an accessible online platform where people can learn about the organisation and easily become involved in its work.

The website will aim to:

- * Increase awareness of Ubuntu Hope Foundation.
- * Provide information about the organisation's programmes and services.
- * Encourage donations.
- * Attract volunteers.
- * Allow people to contact the organisation for assistance.
- * Showcase the organisation's community projects and impact.
- * Build trust and credibility with donors and partners.

Key Performance Indicators (KPIs)

The success of the Ubuntu Hope Foundation website will be measured through:

- * Number of website visitors.
 - * Number of donation enquiries.
 - * Number of completed donations.
 - * Number of volunteer applications.
 - * Number of contact form submissions.
 - * Number of visitors to programme pages.
 - * Social media engagement generated through the website.
-

3. Current Website Analysis

Strengths

If Ubuntu Hope Foundation currently has a basic website, possible strengths could include:

- * Provides basic information about the organisation.
- * Contains contact information.
- * Introduces the organisation's mission.
- * Allows visitors to learn about its work.

Weaknesses

Potential weaknesses could include:

- * Outdated visual design.
- * Limited information about programmes.
- * Difficult navigation.
- * No clear donation call-to-action.
- * Limited information for volunteers.
- * Website may not be mobile-friendly.
- * Lack of photographs showing community projects.
- * No clear explanation of the organisation's impact.

Areas for Improvement

The redesigned Ubuntu Hope Foundation website should:

- * Use simple and clear navigation.
 - * Have a professional and trustworthy appearance.
 - * Include clear Donate, Volunteer and Contact Us buttons.
 - * Provide detailed information about programmes.
 - * Be responsive on phones, tablets and computers.
 - * Include photographs and success stories.
 - * Make important information easy to find.
-

4. Proposed Website Features and Functionality

The Ubuntu Hope Foundation website will include the following pages:

Home Page

The homepage will introduce Ubuntu Hope Foundation and immediately communicate its purpose.

It will include:

- * Organisation name and logo.
- * Short introduction.
- * Mission statement.
- * Featured programmes.
- * Impact statistics.
- * Donate Now button.
- * Become a Volunteer button.
- * Recent community activities.

About Us

This page will provide:

- * Ubuntu Hope Foundation's history.
- * Mission and vision.
- * Organisational values.
- * Team information.
- * Partners and supporters.

Our Programmes

This page will explain the organisation's main programmes, such as:

- * Food assistance.
- * Educational support.
- * Children's support.

- * Community outreach.
- * Clothing and essential-item donations.

Get Involved

Visitors will be able to learn how they can support Ubuntu Hope Foundation through:

- * Volunteering.
- * Donations.
- * Sponsorship.
- * Partnerships.
- * Fundraising.

Donate

The donation page will explain how individuals and businesses can support Ubuntu Hope Foundation.

It can include:

- * Donation options.
- * Suggested donation amounts.
- * Bank details or secure online donation functionality.
- * An explanation of how donations are used.

Contact Us

The page will include:

- * Contact form.
- * Email address.
- * Telephone number.
- * Physical address.
- * Social media links.
- * Operating hours.
- * Map/location.

5. Design and User Experience

Colour Scheme

The proposed colour palette for Ubuntu Hope Foundation will use:

- * Dark blue – represents trust, professionalism and stability.
- * Green – represents growth, hope and community.
- * White – represents simplicity and cleanliness.
- * Light grey – used for background sections.

The colours will create a warm, welcoming and professional appearance appropriate for a non-profit organisation.

Typography

The website will use clean and easy-to-read fonts such as:

- * Poppins for headings.
- * Open Sans for body text.

Headings will be larger and bold, while body text will remain simple and readable.

Layout and Design

The Ubuntu Hope Foundation website will have a clean and modern layout with:

- * Simple navigation bar.
- * Large hero image on the homepage.
- * Clear headings.
- * Short paragraphs.
- * Prominent call-to-action buttons.
- * Images of community activities.
- * Consistent spacing throughout the website.

User Experience

The website should be easy to use for people of different ages and levels of digital literacy.

Important information should be accessible within a few clicks.

The website should:

- * Work well on mobile phones.
- * Have readable text.
- * Use clear buttons.
- * Have consistent navigation.
- * Provide alternative text for important images.
- * Avoid overcrowding the pages.

Low-Fidelity Wireframe

You can use this as the basic homepage wireframe:

6. Technical Requirements

Domain and Hosting

Ubuntu Hope Foundation will require:

- * A suitable domain name, for example ubuntuhopfoundation.org.za.
- * Reliable web hosting.
- * SSL certificate for website security.
- * Regular website backups.

Programming Languages

The website can be developed using:

- * HTML – for the website structure.
- * CSS – for styling and layout.
- * JavaScript – for interactive functionality.

A framework such as Bootstrap could also be used to assist with responsive design.

Additional Requirements

The Ubuntu Hope Foundation website should be:

- * Mobile responsive.
- * Accessible.
- * Secure.
- * Fast loading.
- * Easy for the organisation to update.
 - * Compatible with modern web browsers.
